

# ■■■ ExploraKodo Sensei Performance Report

Certified Performance Record

**Student:** Siddharth  
**Student ID:** siddharth\_test  
**Report Date:** December 27, 2025

## Performance Overview

### Mastery Scores by Track

## Executive Summary

This report summarizes your Japanese language learning progress across the ExploraKodo Triple-Track Coaching system. Your performance is evaluated across three tracks (Care-giving, Academic, Food/Tech) and three skill categories (Vocabulary, Tone/Honorifics, Contextual Logic).

## Track Performance Summary

Track	Overall Score	Status
Care-giving	0.0%	Needs Improvement
Academic	0.0%	Needs Improvement
Food/Tech	0.0%	Needs Improvement

## Detailed Performance by Track

### Care-giving Track

Skill Category	Mastery Score	Level
Vocabulary	0.0%	Beginner
Tone/Honorifics	0.0%	Beginner
Contextual Logic	0.0%	Beginner

#### Sensei's Assessment:

The initial performance demonstrates a need for significant improvement across all evaluated areas: Vocabulary, Tone/Honorifics, and Contextual Logic. To foster growth, a targeted approach focusing on building foundational knowledge in each area is recommended. Specifically, dedicating time to expanding vocabulary relevant to care-giving scenarios, practicing appropriate tone and honorifics through role-playing, and developing logical reasoning skills via scenario analysis will prove beneficial. We believe with dedicated effort and targeted learning, substantial progress is achievable.

### Academic Track

Skill Category	Mastery Score	Level
Vocabulary	0.0%	Beginner
Tone/Honorifics	0.0%	Beginner
Contextual Logic	0.0%	Beginner

#### Sensei's Assessment:

The student demonstrates a foundational understanding of the Academic track concepts but requires significant development in key areas to achieve proficiency. Currently, vocabulary, tone/honorifics, and contextual logic show limited application in assessed tasks. To improve, the student should focus on actively expanding their vocabulary through targeted exercises, practicing the appropriate use of tone and honorifics in different scenarios, and consistently applying logical reasoning skills to analyze and interpret information. Dedicated effort in these areas will lead to substantial progress and a stronger grasp of the academic material.

### Food/Tech Track

Skill Category	Mastery Score	Level
Vocabulary	0.0%	Beginner
Tone/Honorifics	0.0%	Beginner
Contextual Logic	0.0%	Beginner

**Sensei's Assessment:**

The Food/Tech track demonstrates a need for significant improvement across all evaluated metrics, specifically vocabulary, tone/honorifics, and contextual logic. A foundational review of subject-specific terminology and culturally sensitive communication techniques is highly recommended. To improve contextual logic, consider focusing on building connections between user prompts and appropriate responses. Dedicated study and practice in these areas will yield substantial gains in future assessments.

## Recommendations

### Areas for Improvement:

1. **Care-giving - Vocabulary:** 0.0% (Target: 70%+)

Recommendation: Focus on Care-giving track lessons and practice vocabulary.

2. **Care-giving - Tone/Honorifics:** 0.0% (Target: 70%+)

Recommendation: Focus on Care-giving track lessons and practice tone/honorifics.

3. **Care-giving - Contextual Logic:** 0.0% (Target: 70%+)

Recommendation: Focus on Care-giving track lessons and practice contextual logic.

# Career & Visa Outlook

## ***Care-giving Track***

### **Career Readiness:**

**33% (JLPT N5)**

### **Visa Requirements:**

N4 is the minimum requirement for the 'Specified Skilled Worker (i)' visa, while N3 significantly increases salary potential in elderly care facilities.

### **Career Outlook:**

High demand for caregivers in Japan with specialized 'Kaigo' vocabulary.

## ***Academic Track***

### **Career Readiness:**

**33% (JLPT N5)**

### **Visa Requirements:**

N2/N1 targets for MEXT scholarships and entrance into top-tier Japanese Universities.

### **Career Outlook:**

Graduates in Japan have access to the 'Designated Activities' visa for job hunting.

## ***Food/Tech Track***

### **Career Readiness:**

**33% (JLPT N5)**

### **Visa Requirements:**

N4/N3 combined with AI/ML skills contributes points toward the 'Highly Skilled Professional' visa category.

### **Career Outlook:**

Growing 'Startup Visa' opportunities for foreign entrepreneurs in the tech sector.
