

■■■ ExploraKodo Sensei Performance Report

Certified Performance Record

Student: Siddharth
Student ID: siddharth_test
Report Date: December 27, 2025

Performance Overview

Mastery Scores by Track

Executive Summary

This report summarizes your Japanese language learning progress across the ExploraKodo Triple-Track Coaching system. Your performance is evaluated across three tracks (Care-giving, Academic, Food/Tech) and three skill categories (Vocabulary, Tone/Honorifics, Contextual Logic).

Track Performance Summary

Track	Overall Score	Status
Care-giving	0.0%	Needs Improvement
Academic	0.0%	Needs Improvement
Food/Tech	0.0%	Needs Improvement

Detailed Performance by Track

Care-giving Track

Skill Category	Mastery Score	Level
Vocabulary	0.0%	Beginner
Tone/Honorifics	0.0%	Beginner
Contextual Logic	0.0%	Beginner

Sensei's Assessment:

The Care-giving track performance currently indicates a need for significant improvement across all assessed areas: Vocabulary, Tone/Honorifics, and Contextual Logic. While the initial scores are low, this provides a clear baseline for growth. To improve, focus on targeted learning and practice in each area, specifically by studying common care-giving vocabulary and role-playing scenarios that emphasize appropriate tone and logical response. Regular review of relevant materials and active participation in training exercises will be instrumental in achieving substantial progress.

Academic Track

Skill Category	Mastery Score	Level
Vocabulary	0.0%	Beginner
Tone/Honorifics	0.0%	Beginner
Contextual Logic	0.0%	Beginner

Sensei's Assessment:

The student demonstrates a foundational understanding of the Academic track's core concepts, yet currently requires significant development in Vocabulary, Tone/Honorifics, and Contextual Logic. Focusing on targeted vocabulary acquisition and practice applying appropriate tone and honorifics in varied scenarios is crucial. Building stronger inferential reasoning skills through exercises that require logical deduction and contextual understanding will also substantially improve overall performance.

Food/Tech Track

Skill Category	Mastery Score	Level
Vocabulary	0.0%	Beginner
Tone/Honorifics	0.0%	Beginner
Contextual Logic	0.0%	Beginner

Sensei's Assessment:

The initial performance in the Food/Tech track demonstrates a foundational opportunity for growth across key linguistic elements. While vocabulary, tone/honorifics, and contextual logic currently present as areas requiring development, this provides a clear starting point for targeted training. Focus on building a base vocabulary related to Food/Tech, actively practicing respectful and appropriate tone in various scenarios, and working through examples that require logical deduction based on provided context. Continued effort in these areas will significantly contribute to enhanced performance and effective communication within the track.

Recommendations

Areas for Improvement:

1. **Care-giving - Vocabulary:** 0.0% (Target: 70%+)

Recommendation: Focus on Care-giving track lessons and practice vocabulary.

2. **Care-giving - Tone/Honorifics:** 0.0% (Target: 70%+)

Recommendation: Focus on Care-giving track lessons and practice tone/honorifics.

3. **Care-giving - Contextual Logic:** 0.0% (Target: 70%+)

Recommendation: Focus on Care-giving track lessons and practice contextual logic.

Career & Visa Outlook

Care-giving Track

Career Readiness:

33% (JLPT N5)

Visa Requirements:

N4 is the minimum requirement for the 'Specified Skilled Worker (i)' visa, while N3 significantly increases salary potential in elderly care facilities.

Career Outlook:

High demand for caregivers in Japan with specialized 'Kaigo' vocabulary.

Academic Track

Career Readiness:

33% (JLPT N5)

Visa Requirements:

N2/N1 targets for MEXT scholarships and entrance into top-tier Japanese Universities.

Career Outlook:

Graduates in Japan have access to the 'Designated Activities' visa for job hunting.

Food/Tech Track

Career Readiness:

33% (JLPT N5)

Visa Requirements:

N4/N3 combined with AI/ML skills contributes points toward the 'Highly Skilled Professional' visa category.

Career Outlook:

Growing 'Startup Visa' opportunities for foreign entrepreneurs in the tech sector.
