Certified Performance Record

Student: Siddharth
Student ID: siddharth_test
Report Date: December 29, 2025

Performance Overview

Mastery Scores by Track

Executive Summary

This report summarizes your Japanese language learning progress across the ExploraKodo Triple-Track Coaching system. Your performance is evaluated across three tracks (Care-giving, Academic, Food/Tech) and three skill categories (Vocabulary, Tone/Honorifics, Contextual Logic).

Track Performance Summary

Track	Overall Score	Status
Food/Tech	0.0%	Needs Improvement
Academic	0.0%	Needs Improvement
Care-giving	0.0%	Needs Improvement

Detailed Performance by Track

Food/Tech Track

Skill Category	Mastery Score	Level
Vocabulary	0.0%	Beginner
Tone/Honorifics	0.0%	Beginner
Contextual Logic	0.0%	Beginner

Sensei's Assessment:

The Food/Tech track demonstrates a strong potential for growth. Currently, the performance across Vocabulary, Tone/Honorifics, and Contextual Logic requires focused attention. We recommend prioritizing targeted practice in these areas, particularly through reviewing industry-specific glossaries and engaging in role-playing scenarios to improve understanding of appropriate communication styles. Continuous learning and active participation in available resources will significantly enhance future performance.

Academic Track

Skill Category	Mastery Score	Level
Vocabulary	0.0%	Beginner
Tone/Honorifics	0.0%	Beginner
Contextual Logic	0.0%	Beginner

Sensei's Assessment:

The student currently demonstrates a need for substantial development in core language skills within the Academic track. While the initial performance metrics are at 0.0% across Vocabulary, Tone/Honorifics, and Contextual Logic, this provides a clear baseline for growth. Focused effort should be directed towards building fundamental vocabulary, understanding appropriate tone and honorific usage, and strengthening logical reasoning skills through targeted exercises and focused study. We encourage the student to actively engage with provided resources and seek support to achieve significant improvement in these crucial areas.

Care-giving Track

Skill Category	Mastery Score	Level
Vocabulary	0.0%	Beginner
Tone/Honorifics	0.0%	Beginner
Contextual Logic	0.0%	Beginner

Sensei's Assessment:

The initial performance indicates a significant opportunity for growth within the Care-giving track. While the current scores reflect a need for immediate improvement across all areas, specifically vocabulary, tone/honorifics, and contextual logic, this presents a strong baseline to build upon. Focusing on targeted training modules designed to enhance vocabulary relevant to care-giving scenarios, coupled with practical exercises in applying appropriate tone and honorifics, should yield positive results. Further development of contextual logic skills can be achieved through role-playing exercises that simulate common care-giving interactions and require problem-solving based on nuanced situations.

Recommendations

Areas for Improvement:

1. **Food/Tech - Vocabulary:** 0.0% (Target: 70%+)

Recommendation: Focus on Food/Tech track lessons and practice vocabulary.

2. **Food/Tech - Tone/Honorifics:** 0.0% (Target: 70%+)

Recommendation: Focus on Food/Tech track lessons and practice tone/honorifics.

3. **Food/Tech - Contextual Logic:** 0.0% (Target: 70%+)

Recommendation: Focus on Food/Tech track lessons and practice contextual logic.

Career & Visa Outlook

Food/Tech Track

Career Readiness:

33% (JLPT N5)

Visa Requirements:

N4/N3 combined with AI/ML skills contributes points toward the 'Highly Skilled Professional' visa category.

Career Outlook:

Growing 'Startup Visa' opportunities for foreign entrepreneurs in the tech sector.

Academic Track

Career Readiness:

33% (JLPT N5)

Visa Requirements:

N2/N1 targets for MEXT scholarships and entrance into top-tier Japanese Universities.

Career Outlook:

Graduates in Japan have access to the 'Designated Activities' visa for job hunting.

Care-giving Track

Career Readiness:

33% (JLPT N5)

Visa Requirements:

N4 is the minimum requirement for the 'Specified Skilled Worker (i)' visa, while N3 significantly increases salary potential in elderly care facilities.

Career Outlook:

High demand for caregivers in Japan with specialized 'Kaigo' vocabulary.
